DETAILED ACTION

1. Claims 1-21 are presented for examination.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 11-20 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. In order for a computer program to be statutory it must be **tangibly embodied on computer readable medium/media**. In this particular case, applicant has included computer readable media as transmission-type media, such as digital and analog communications links, wired or wireless communications radio frequency and light wave transmissions [see the specification, page 31, last paragraph]. When the computer readable medium is a transmission-type as described above, the claims are not tangible. Furthermore, Applicant stated in the preamble that the claims are directed to a computer program product not a computer readable medium. Clearly, the computer program product can be reasonably interpreted as a computer program itself. A computer program by itself is not a statutory matter.

Allowable Subject Matter

4. Claims 1-10 and 21 are allowed over the prior art of record because none of the prior art of record teaches or fairly suggests the claimed operation related to the pre-translated segment, as claimed in the independent claim 1, lines 3-12; and claim 21, lines 3-12.
